Southeast Workforce Priorities:
In Southeast Alaska, TVEP funds have supported industry-identified workforce priorities especially in marine transportation and fisheries technology. These programs are implemented in alignment with both public and private sector partners, including Vigor Alaska/Ketchikan Shipyard and Icicle Seafoods. The University of Alaska Southeast also works closely with local and regional economic development entities, such as the Southeast Conference and the Juneau Economic Development Council.

Southcentral Workforce Priorities:
As the University of Alaska’s Health Campus, UAA has focused a significant portion of their TVEP funds to expand or develop new health programs, such as nursing, ultrasound technology, paramedic training, physical therapy and expanded functions in dental. Many of these health programs are distance delivered and/or offered at rural campuses on a rotating schedule, making this high-demand training available to students across the state.

Interior Workforce Priorities:
TVEP funding supports the oil and gas industries by expanding program delivery and hands-on equipment needs for process technology programs in the Kenai Peninsula, Anchorage and Fairbanks. The funding also goes to the Fairbanks Pipeline Training Center, which is an integral part of the overall success in supporting this workforce priority in Alaska’s interior.

Statewide Workforce Priorities:
TVEP funding supports the delivery of Mine Safety and Health Administration regulatory training across the state and the startup of the University of Alaska Southeast Mine Training Center, which includes a state-of-the-art mine training simulator. TVEP also supports initiatives focused on creating clear education pathways from K-12 to career, many with an emphasis on rural and native student success.
