

Find the Citrix ICA Client Editor and open it up. Once open go to File, Open, and browse to and open your configuration file for Banner Production or Databrowser 6i Runtime. These configuration files are the icons that you double click on to get into Banner.

When you have opened your file you should see something like this below that will have the old Oratools/Bannersw with no password

Change the username/password/domain to look like the below by putting in banner1 as the password and sw in the domain field

Databrowser 6i Runtime
