

Enabling the Vendor Supplied Adult Content Filter

1. Open any Proofpoint Digest message and click on 'Manage My Account'

2. Click on the 'Profile' section in the lower right of your screen

3. Click the radio button beside the spam policy you would like to use. In this case, it's the vendor supplied adult content filter. Once done, click 'Save' in the upper left of your screen.

The screenshot shows a web interface with a top navigation bar containing 'Save', 'Request Digest', and 'Refresh' buttons. The main content is divided into two panels: 'Profile' on the left and 'My Settings' on the right. The 'Profile' panel includes links for 'My Profile', 'Settings', and 'Account'. The 'My Settings' panel contains several configuration options:

- Send digest with new messages in my End User Digest.
- Send digest even when I have no messages in my End User Digest.
- Preferred Language: English (US) (dropdown menu)
- What type of spam detection do you want? Please select a policy from the list below.
 - Default
 - Don't do anything at all
 - Same rules but no quarantine
 - Adult content filter. This will quarantine any mail messages containing adult language.**
 - Global Spam Policy
