This report shows the final FY11 performance by each MAU in comparison to the current FY12 performance level, calculated as of the date in the lower right hand corner of this page.

**PERFORMANCE MEASURE DEFINITION:** The number of student credit hours attempted. Student credit hours (SCH) are calculated by totaling the course credit hours for students enrolled for credit in courses at all UA campuses, including audited SCH. Summer, fall, and spring closing semester data are used as well as year-long closing data in the computation of statistics. SCH figures include all credit courses, including audit, 500 level, developmental, distance education, self-support and correspondence courses. Note that courses numbered 000 to 049 are non-credit and by definition do not have SCH associated with them. A fiscal year consists of consecutive summer, fall and spring semesters.

**DATA SOURCE:** Data supplied by MAUs via UA Information Systems, compiled by SWIRP: Banner SI closing extracts, FY11, summer 2011; Banner daily enrollment extracts, fall 2011. To-date FY12 year long course activity is not captured in the figures above.
