The University of Alaska Anchorage (UAA) extension site at the scenic Chugiak-Eagle River Campus (CERC) provides curricula and activities to meet the needs of our area through post-secondary courses, workforce development, professional education, and student support services. Our campus acts quickly to address the needs of the local community while working in concert with the College of Arts and Sciences, the College of Business and Public Policy and other university and industry partners in the region.

The UAA Chugiak-Eagle River Campus resides in the Community & Technical College (CTC), one of the seven UAA schools and colleges. CTC is the second largest and most diverse college in the university. The college includes 15 academic and service departments and divisions, both academic and non-academic. CTC delivers instruction through 82 academic programs: 25 occupational endorsement certificates, 21 undergraduate certificates, 27 associate of applied science degrees, 8 bachelor of art/science degrees, and 1 master of science degree. These programs are supported by more than 180 full-time faculty and staff and over 200 adjunct faculty. CTC also serves as a major center for development and delivery of career, technical, community, workforce, and continuing education programs. The college has a commitment to innovation and flexibility ensuring high quality education and training are available to all who have the ability and interest to pursue an education or profession.

CERC shares in the overall mission of UAA and CTC providing working adults and other students the opportunity to move forward towards educational goals by offering convenient evening and weekend courses. The campus serves nearly 5,000 students and generates over 17,000 credit hours annually. In addition, the college’s growing workforce development, training, and community and continuing education programs are housed at the campus. The campus uses only adjunct faculty, approximately 100 annually, to deliver this instruction.

CERC offers a variety of General Education Requirements (GERs) for students, as well as required courses across several programs and elective/general interest courses. We offer classes in all major disciplines from accounting to sociology. The campus houses two open computer labs, a Learning Center, and an ACT Testing Center.
