

ALEKS uses your UA Username and password to login. So, begin the process by answering this question:

DO YOU KNOW YOUR UNIVERSITY OF ALASKA USERNAME (example: jdoe) and PASSWORD?

YES - If you already know your UA username and password, take the ALEKS Math test

MAYBE - If you have ever enrolled with the University of Alaska, you have a username! Find your username and create a password at the Easy Login Maintenance Option

(ELMO): <http://elmo.alaska.edu>

NO - If you do **NOT** have a UA Username or password, start the process!

Applying for Admission as a non-degree seeking student will create a UA ID for you. Your UA ID will help you find your UA Username and password to test. To apply for an UA ID, click [here](#).

1. Select a campus and click 'Apply'.
2. When you've created your profile, click "My Profile" at the top of the screen to continue the application process.
3. Once your non degree seeking application is complete and submitted, it may take up to 24 hours for the system to create your UA ID.
4. After this time, search on ELMO (link above and Option #3) for your UAID and then create your password.
5. Once you have both your UA ID and password- take the test! (link above)

Need help?

Account and login troubleshooting can be addressed by contacting the University of Alaska OIT Department:
