

The UAS School of Career Education is located in downtown Juneau at the Technical Education Center (TEC), offering health care, construction, welding, and power technology programs.

TEC provides programs to meet the short-term training needs and long-term vocational, technical, and occupational needs of the residents of Southeast Alaska. These programs provide specific job-related skills for employment, lifelong learning opportunities, and professional advancement. TEC programs and courses provide students with employment skills for entry into the job market, industry-specific skill upgrade or retraining, occupational endorsements, and preparation for license examinations.

ACADEMIC YEAR 2024

- 227 students
- 4 full-time faculty
- 5 full-time staff

PROGRAMS

- 11 occupational endorsement certificates
- 5 certificate programs
- 4 associate degree programs

"I had the chance to work with Robin (faculty member) my senior year of high school in the House Build Program, so having the opportunity this year to be directly under her teaching was a privilege. Being able to see what she does herself in the industry has been a great inspiration to my future after UAS, and to all the future women in trades."

-Paige Adams, Construction Technology student

TRANSFORMING EDUCATION TO CAREER OUTCOMES

A year after graduating, UAS Juneau 2-year degree program and certificate graduates (FY17 - FY21) were earning an average of \$37,259 annually, about 17 percent (\$5,544) more than they did one year before earning the certificate or degree. Program graduates (FY13 - FY17) working for 5 years were making 52 percent (\$19,291) higher wages on average than graduates who had only been working one year, showing that the earnings boost from a UAS Juneau credential increases over time.

One Year before Graduation	One Year after Graduation	Five Years after Graduation	Salary Increase (One Year to Five)	% Increase (One Year to Five)
\$31,714	\$37,259	\$56,550	\$19,291	34.1%

ENROLLMENT PROFILE

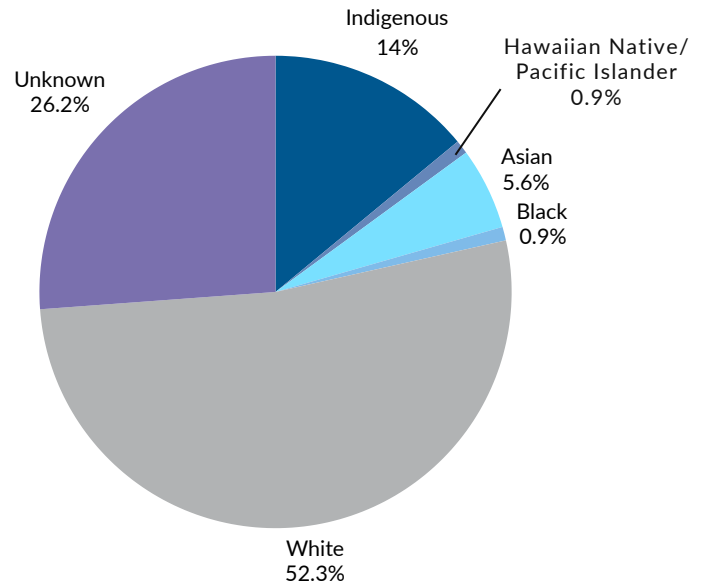

*Dual enrollment refers to enrollment at the university by a student who is simultaneously enrolled in a K-12 (or homeschool) for which the student may receive credit at both the K-12 and postsecondary levels.

STUDENT PROFILE

RACE/ETHNICITY

Center for Mine Training

SCE includes the UAS Center for Mine Training (CMT). The mission of the CMT is to provide world-class workforce training in occupational fields leading to employment in the mining industry, with special emphasis on expanding an Alaskan workforce for underground hard rock mining. The Center provides varied educational activities including credit and non-credit programs, such as Mine Safety Training, Orientation Courses, Workforce Credentials, Occupational Endorsements, Certificates, and Associate-level degrees for those seeking a career in the mining industry.

Increased Accessibility

Courses are delivered using a variety of teaching methods, including e-Learning technologies through audio, video, online, and printed materials. Vocational-technical laboratories provide students with state-of-the-art equipment comparable to what would be experienced in industry. To accommodate training needs of business and industry, some courses are compressed from meeting a few hours per week for a semester into day-long classes that may meet for more than a week. This arrangement allows students to complete course offerings in an abbreviated time period that may more easily accommodate a nontraditional student schedule.

Community Impact

UAS TEC fosters partners in industry to provide state-of-the-art training equipment, internships, and career paths, including partnerships with:

- Alaska Glacier Seafoods
- Alaska Marine Highway
- Douglas Island Pink and Chum
- Hecla Mining
- Hoonah Native Forest Partnership
- Juneau Alaska Music Matters
- National Oceanic and Atmospheric Administration
- Sen. Ted Stevens Foundation: Legislative Internship Program
- United States Coast Guard
- Vigor Shipyards
