Sightlines, LLC University of Alaska System Presentation FY2012

Date: April 3, 2013

Presented by: Colin Sanders, Laura Vassilowitch & Sheena Salsberry

Sightlines

Sightlines Profile

Reference 52

Sightlines

Common vocabulary, consistent methodology, credibility through benchmarking

Asset Value Change

The annual investment needed to ensure buildings will properly perform and reach their useful life
"Keep-Up Costs"

Annual Stewardship

The accumulated backlog of repair and modernization needs and the definition of resource capacity to correct them.
"Catch-Up Costs"

Asset Reinvestment

Operations Success

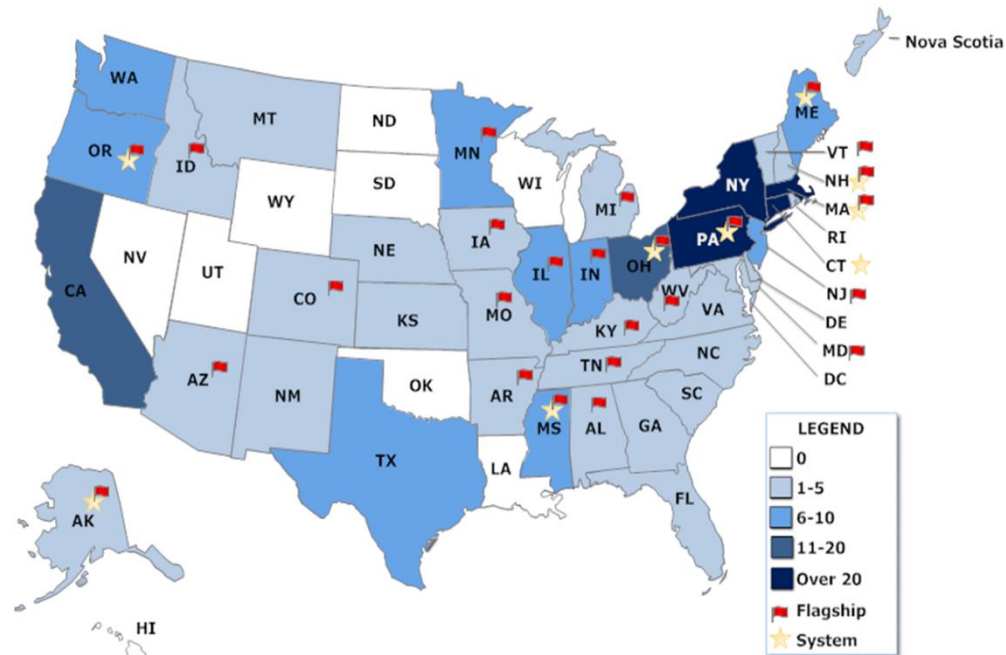

The effectiveness of the facilities operating budget, staffing, supervision, and energy management

Operational Effectiveness

The measure of service process, the maintenance quality of space and systems, and the customers opinion of service delivery

Service

System Peers

- ***Connecticut****
- Maine
- Missouri
- Mississippi
- New Hampshire
- Oregon
- Pennsylvania

**New system peer*

Sightlines

Common vocabulary, consistent methodology, credibility through benchmarking

Asset Value Change

Operating funds:

- State General Funds
- Student tuitions & Fees
- F&A Recovery
- Other

Annual Stewardship

Capital funds:

- Bonds
- State General Funds
- Federal Grants
- Foundations Grants

Asset Reinvestment

Operations Success

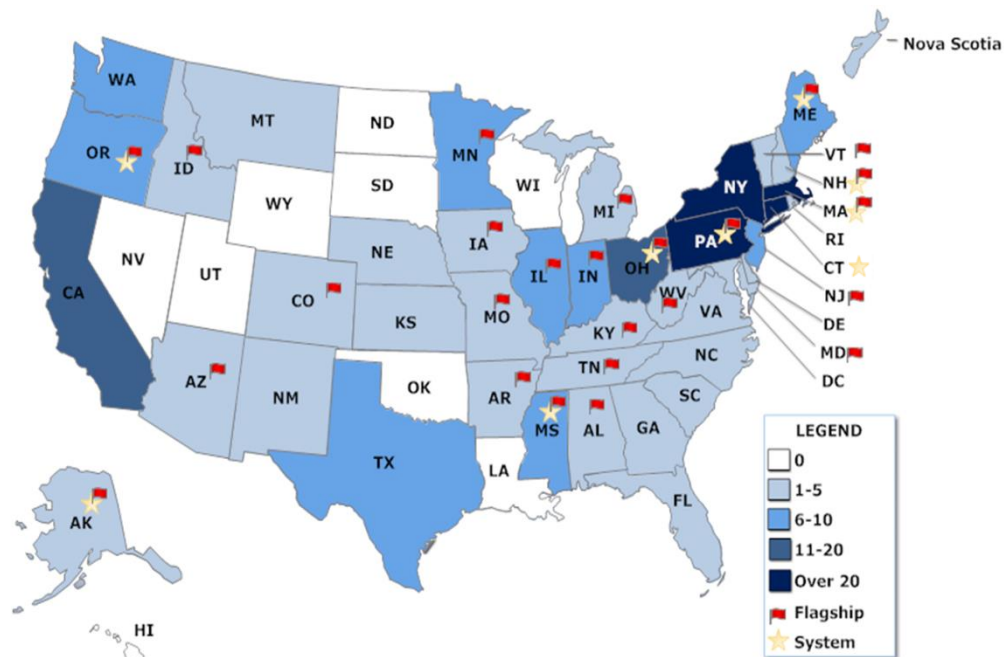

- Facilities operating budget
- Staffing levels
- Energy cost and consumption

Operational Effectiveness

- Campus Inspection
- Service Process
- Customer Satisfaction Survey

Sightlines

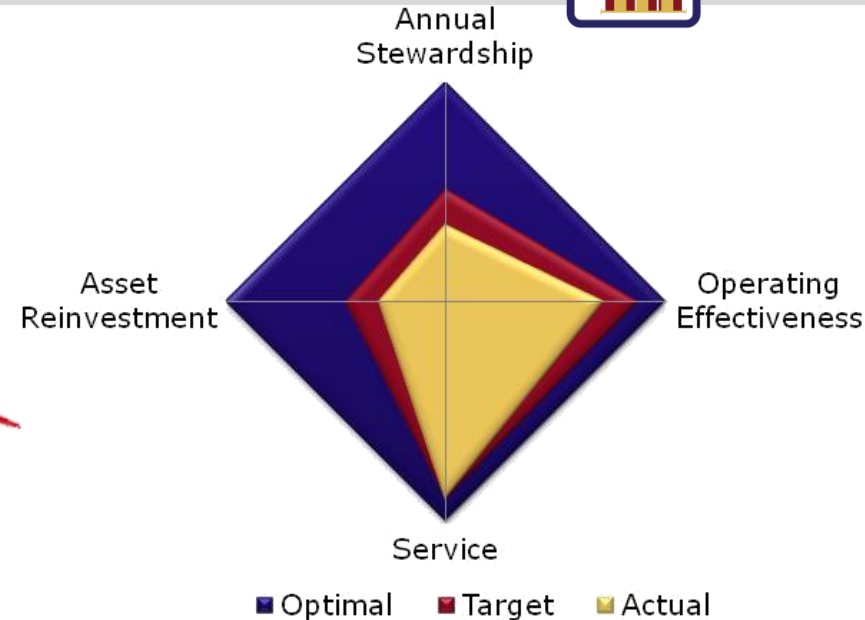

Total GSF: 6.6M GSF; 346 buildings

MAUs			
Campuses	<ul style="list-style-type: none"> • Anchorage • Kenai Peninsula • Kodiak College • Matanuska- Susitna College • Prince William Sound Community College 	<ul style="list-style-type: none"> • Fairbanks • Community and Technical College • College of Rural & Community Development 	<ul style="list-style-type: none"> • Juneau • Ketchikan • Sitka
GSF	2.6M GSF	3.3M GSF	569K GSF
Bldg. #	95 Buildings	212 Buildings	39 Buildings

When Stewardship falls...

1. Failures increase
2. Operational effectiveness falls
3. Customer satisfaction decreases
4. Capital investment is driven by customers. Space wins over systems.
5. The backlog of needs increases

Focused project selection...

1. Decreases operating costs
2. Savings Increase stewardship
3. Planned maintenance grows
4. Customer satisfaction improves
5. Greater flexibility of project selection repeats the cycle.

Sightlines Database

Western Region Trends

(AK, AZ, CA, CO, ID, MT, NM, OR, TX, WA)

#1 Dichotomy of campus age profiles

Campuses are growing older

Reference 52

Sightlines

**(%) Square Footage over 25 years old
(Renovation Age)**

Western Region (AK, AZ, CA, CO, ID, MT, NM, OR, TX, WA)

#2 Cyclical capital investments

Investments decreasing to national database average

Reference 52

Sightlines

Capital Investment into Existing Space

Western Region (AK, AZ, CA, CO, ID, MT, NM, OR, TX, WA)

#3 Less investment into space projects in 2012

Shifting investments towards building envelope, system, and infrastructure needs

Reference 52

Sightlines

Western Region Total Project Spending

2007

2012

■ Building Envelope ■ Building Systems ■ Infrastructure
■ Space Renewal ■ Safety/Code

Western Region (AK, AZ, CA, CO, ID, MT, NM, OR, TX, WA)

#4 Steady increase in backlog

The western region saw an 11% increase in backlog since FY07

Sightlines

Backlog \$/GSF

Western Region (AK, AZ, CA, CO, ID, MT, NM, OR, TX, WA)

UA System profile

Major factors that influence campus operations and decisions

Alaska in Context: Campus renovation age vs. peers

Reference 52

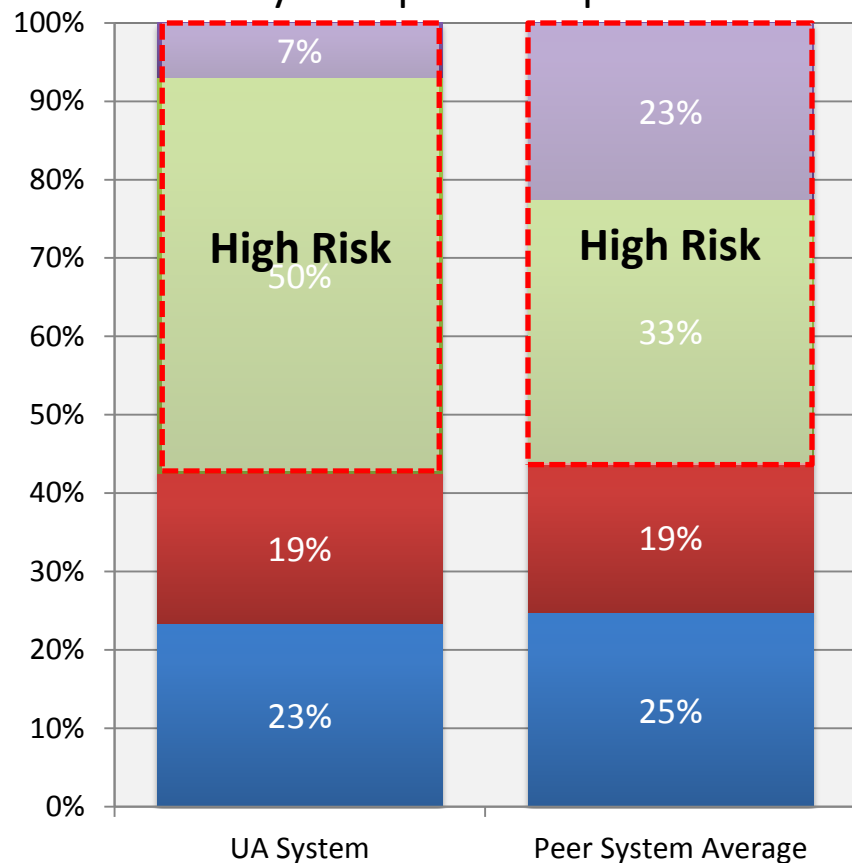

Sightlines

57% of Alaska System space is over 25 years old

Renovation Age Categories

System peer comparison

% of space over 25 years old

Peer system comparison

Systems Ordered by Tech Rating

Peer System Average

Under 10 10 to 25 25 to 50 Over 50

Renovation Age Categories

System peer comparison

■ Under 10 ■ 10 to 25 ■ 25 to 50 ■ Over 50

Buildings over 50

Life cycles of major building components are past due. Failures are possible. Core modernization cycles are missed.

Highest risk

Buildings 25 to 50

Life cycles are coming due in envelope and mechanical systems. Functional obsolescence prevalent.

Higher Risk

Buildings 10 to 25

Lower cost space renewal updates and initial signs of program pressures

Medium Risk

Buildings Under 10

Little work, "honeymoon" period.

Low Risk

Alaska in Context: Tech rating

Alaska System Tech Ranges from 2.5 to 3.3

Reference 52

Sightlines

Capital, Budget, and Operations

Asset value change and performance value

Total capital spending

Total FY12 investment was \$130M

Reference 52

Sightlines

Total UA System

Capital Spending

Project split-out

FY06-FY12

\$32.2M	\$28.4M	\$99.9M	\$90.2M	\$78.7M	\$98.6M	\$130M
---------	---------	---------	---------	---------	---------	--------

Total capital spending in facilities

Total facilities related investments in FY12 was \$54M

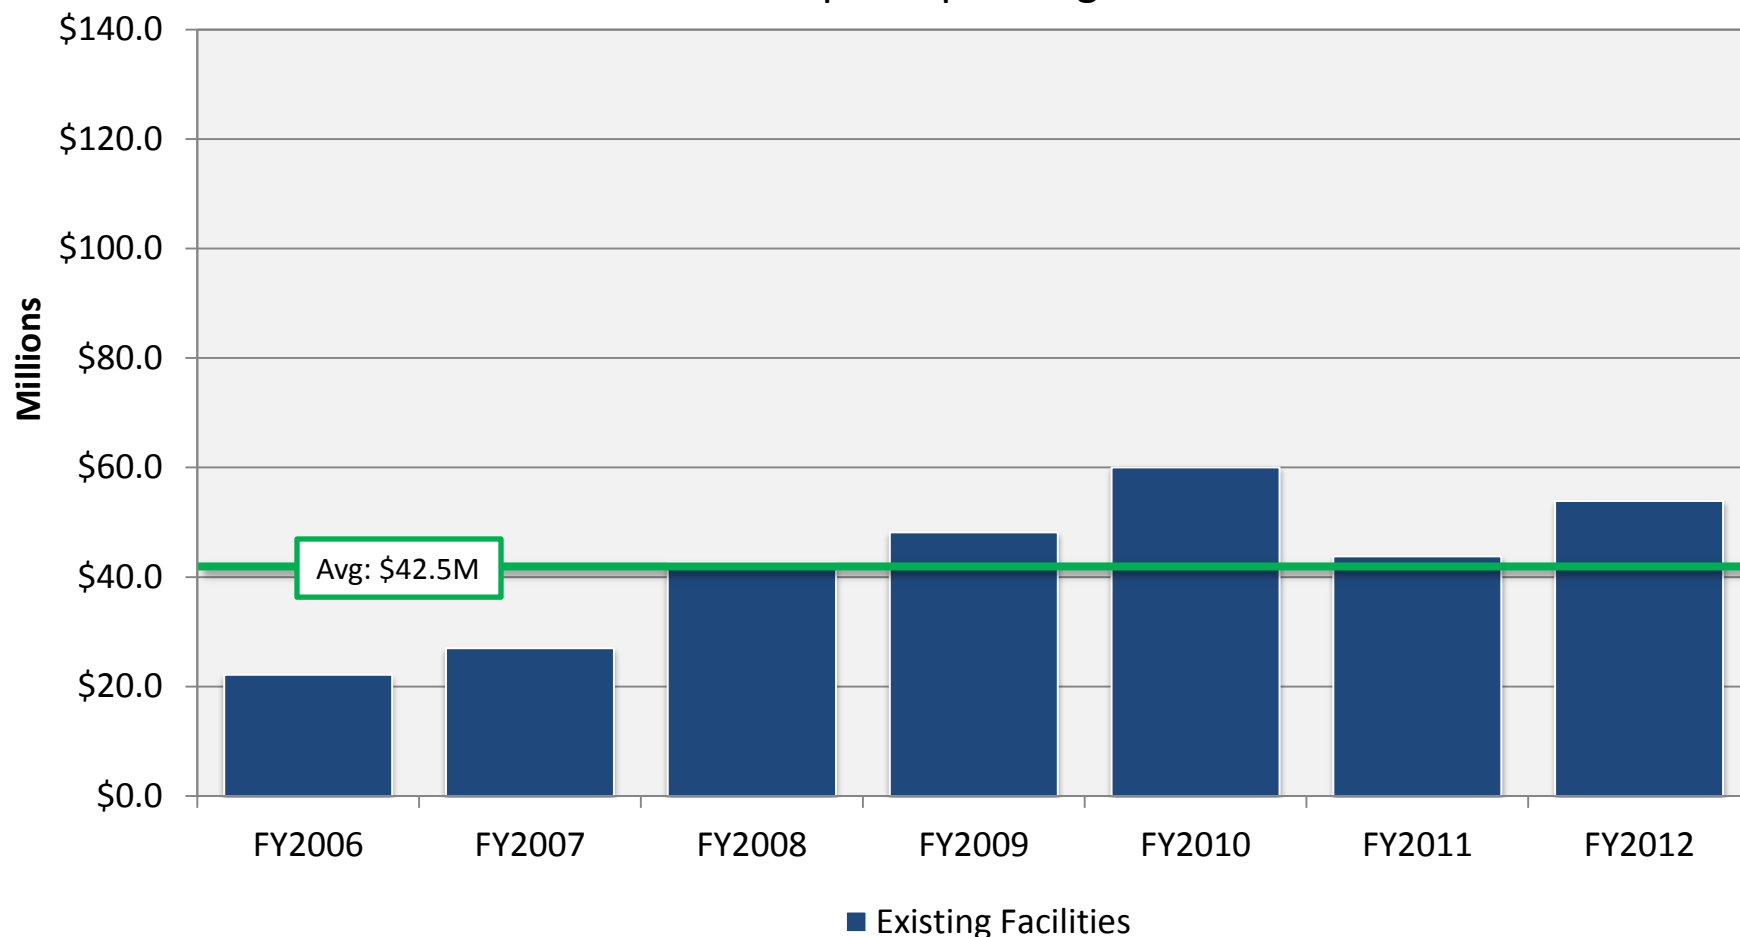

Reference 52

Sightlines

Total UA System

Capital Spending

\$22.2M	\$27.0M	\$42.7M	\$48.2M	\$60.0M	\$43.8M	\$53.9M
---------	---------	---------	---------	---------	---------	---------

Sightlines' stewardship "Best Practice" target

Creating a target for recurring funding sources from operating budget funds

Reference 52

Sightlines

UA System – FY2012 Stewardship Targets

Annual Stewardship

Recurring capital : *M&R and R&R projects**

Planned Maintenance: *Service contracts and PM work order labor and materials*

*Stewardship and Reinvestment classifications are based on *funding source* rather than *type of work*

Total capital investment vs. target need

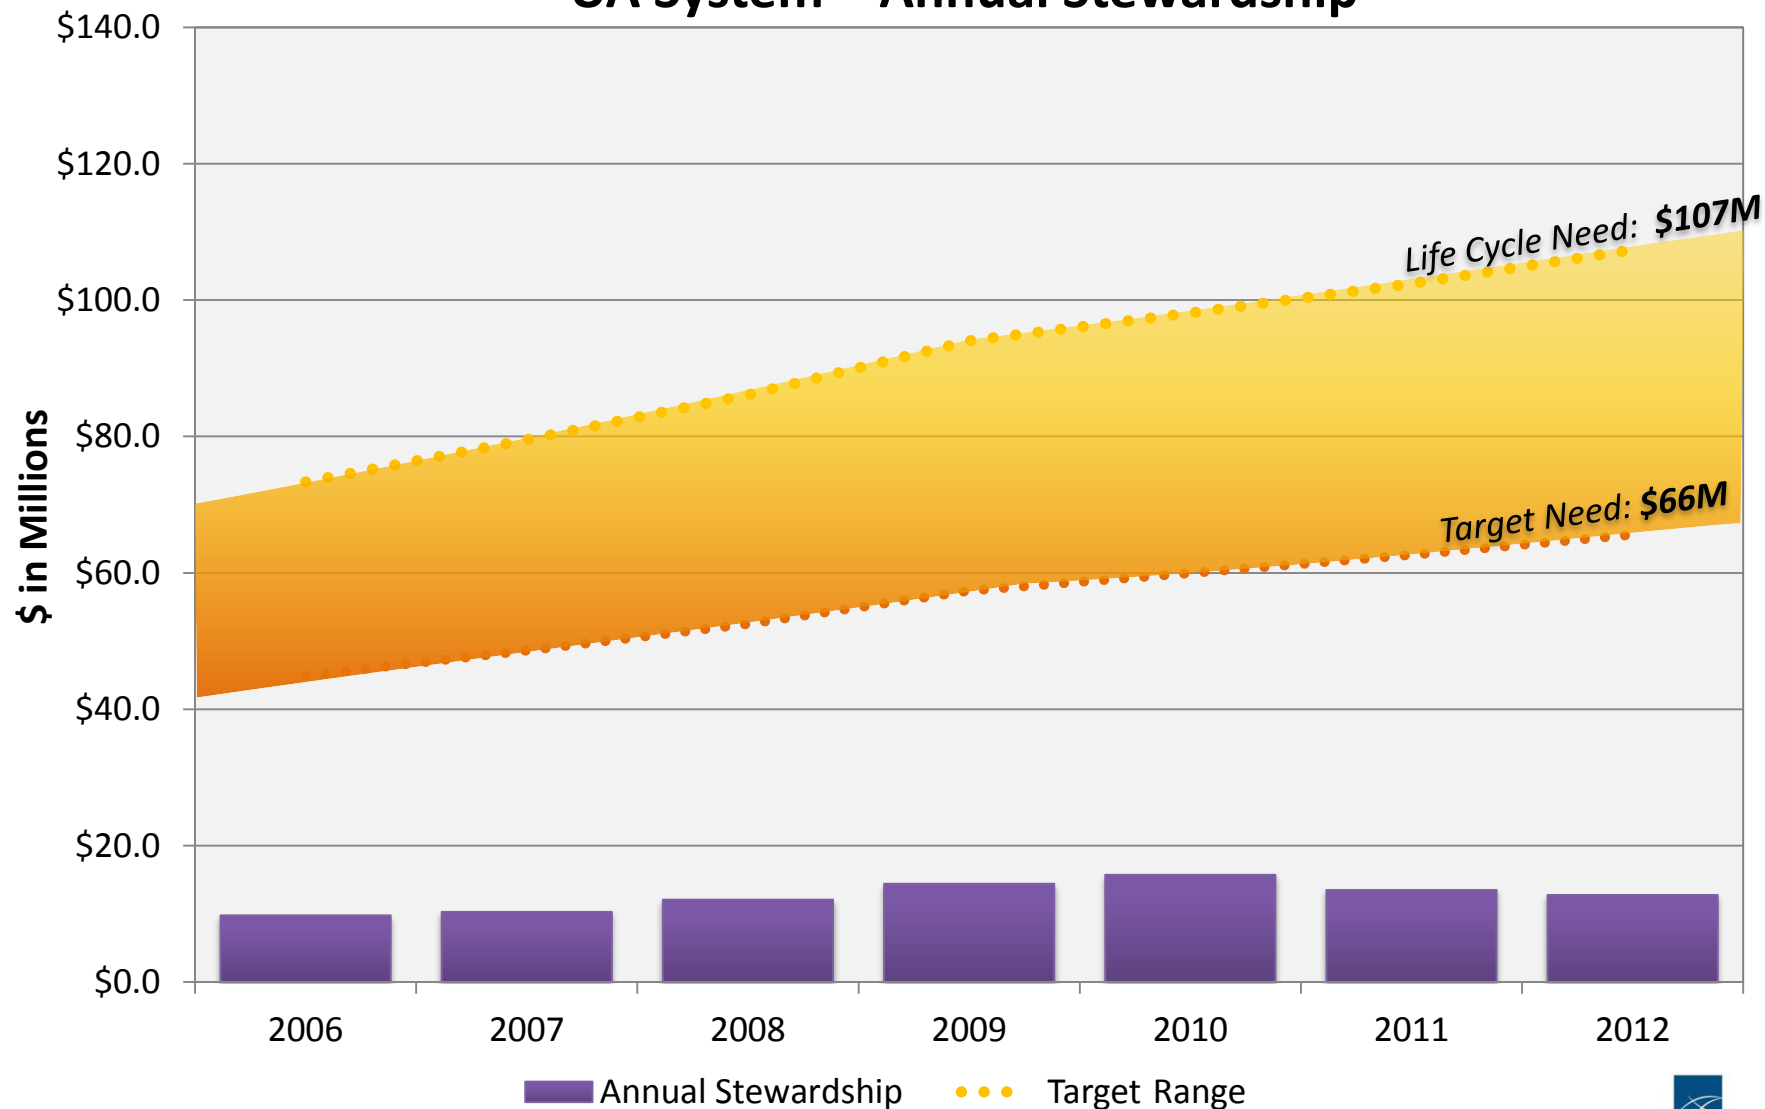

Reference 52

Sightlines

Funding 19% of stewardship target on average

UA System – Annual Stewardship

**Capital investments includes renovation of vacated space*

Total capital investment vs. target need

Reference 52

Sightlines

Deferral rate since FY06 totals up to \$303M

UA System – Annual Stewardship

**Capital investments includes renovation of vacated space*

Capital investment vs. target comparison

Increasing AS by \$8.2M each year will help UA System reach Sightlines' target range

Reference 52

Sightlines

% of Target – 7 year average

By MAU

Target Range – Sustaining or Increasing Net Asset Value

% of Target – 7 year average

Sightlines

Maintenance Staffing Coverage GSF/FTE

Maintenance Staffing Coverage Maintained Buildings/FTE

Peer System Average

General Repair score (1-5)	UA System avg.	Peer System avg.
	4.07	3.80

Custodial performance

Covering more buildings with comparable inspection scores

Custodial Staffing Coverage

GSF/FTE

Custodial Staffing Coverage

Cleaned Buildings/FTE

Peer System Average

Cleanliness Score (1-5)	UA System avg.	Peer System avg.
	4.00	4.10

University of Alaska System

Bringing it all together

FY10 Recommendations

*Reduce effects of a **high cost structure**, **campus complexity** and **regional strain** by:*

- ✓ Tracking operations and capital data consistently across all MAU's to ensure accurate comparisons and analysis
- ✓ Quantifying the backlog consistently across all MAU's to aid in implementing a long-range capital plan that includes both keep-up and catch-up funding
 - Monitoring daily operations to maximize efficiencies and track the correlation between change in backlog and operational metrics, including:
 - Operating budget
 - Energy consumption
 - Staffing levels
 - Campus inspection
- ✓ Monitoring academic space utilization rates to ensure efficient use of facilities

FY11 Recommendations

- Create a manageable target that is applicable to all the MAUs that will help reduce the backlog and maintain facilities at a sustainable level
- Understand impact of wide ranging density factors, tech ratings, and age, and develop differentiated maintenance, repairs, and stewardship strategies for each MAU
- ✓ Fund projects that will steward the space under 10 (keep your young space young), and address the life cycles/deferred needs in space over 25 (renovate older, worn out buildings)
 - ***University Building Fund (In progress)***

Continue to complete the Investment Strategy Building Chart to incorporate plans for future budgets. Putting a strategy in place will help reach the goal to decrease the DM&R

FY14 Sustainment Funding Plan for UA Facilities

Decreasing the DM&R will help relieve stress on facilities maintenance and operations budget

While adopting new investment strategies, a consistent method of communicating to the campus community is vital for expectation levels. Providing feedback for work requests will help with the scheduling and service levels, also helping to address overall general satisfaction

Questions and Discussion

Appendix

Tech Rating by Campus

Database Average

- 5. •All of 4 and 100% outside air; Bio containment level 2 or 3
- 4. •High pressure steam; Central cooling- VAV system; Chillers; DDC Controls; HVAC system; Fume Hoods
- 3. •Medium pressure steam; Central cooling; pneumatic controls
- 2. •Low pressure steam; local cooling (window unit)
- 1. •Residential grade or no heating; no cooling
