Importance of Saving

Common rules of thumb:

• Minimum savings for retirement should be the percentage that represents one half your age:
  ✓ At age 36, saving at least 18%
  ✓ At age 52, saving at least 26%

• Some experts say you will need 85-100% (or more) of your present income to live comfortably in retirement

Vesting

Employee Contributions:
• Participant contributions are immediately 100% vested

Employer Contributions:
• Participants vest in the employer contributions:
  • 25% vested with **two years of service**
  • 50% vested with **three years of service**
  • 75% vested with **four years of service**
