POLICY CITATION
P05.12.050. Campus Master Plans. The administration will develop and present to the board for adoption, a campus master plan for each campus. The purpose of a campus master plan is to provide an integrated framework for investment decisions that will ensure adequate facilities to support implementation of the respective system and university campus academic, strategic and capital plans.

RATIONALE AND RECOMMENDATION
Regents' Policy requires a review and update on a five to seven year cycle. The University of Alaska Fairbanks' (UAF) current master plan was approved in 2010. In September 2016, UAF requested and received a 2-3 year deferral on the master plan update to allow time for the Strategic Pathways process to be completed so that any recommendations could be incorporated into the updated UAF master plan. In February 2019, UAF completed an update to the plan to include UAF strategic goals and revised the timeline to reflect the fiscal climate at the state and university level, including the Board of Regents' (BOR) most current strategic goals/metrics. The BOR provided a one-year provisional approval in June 2019, requesting UAF seek approval of the master plan upon expiration of the one-year extension.

A recent appraisal estimated the fair market value of the building and property to exceed $1,000,000. The buildings and property are classified as non-trust land. The net proceeds from the sale are intended to offset UAF’s costs associated with budget reduction activities, including staff transition to other Seward facilities, space modernization, footprint reduction, and provide one-time funding for long-term actions in progress.

UA Land Management intends to proceed with the disposal plan and seek public comment on Land Management’s website (www.ualand.com) upon receiving authorization from the Board of Regents.
