

## Connecting to eduroam (Windows 7)

This guide will help you connect to the eduroam Wi-Fi network.

**Go to [radius.alaska.edu/eduroam](http://radius.alaska.edu/eduroam) in a browser like Google Chrome or Mozilla Firefox.**

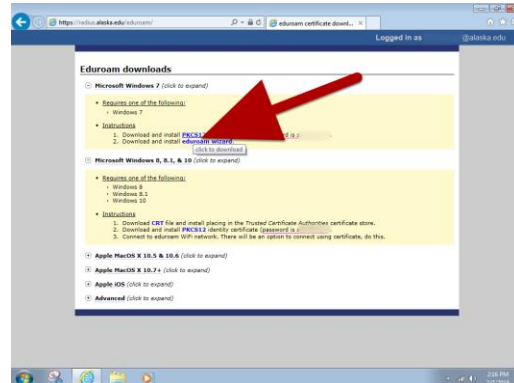

**Login using your UA username and password**

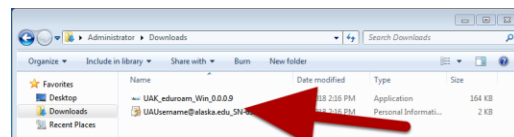

**The section for Windows 7 should be automatically opened, from that section download the PKCS12**

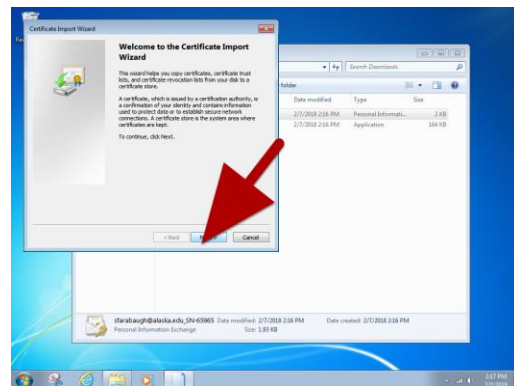

## certificate and the eduroam wizard

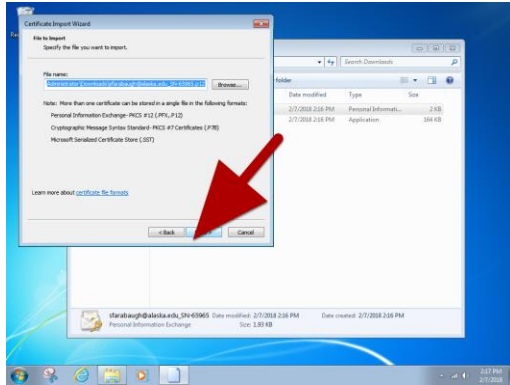

**The PKCS12 certificate downloads as UAXusername@alaska.edu and the wizard downloads as "UAK\_eduroam\_Win\_0.0.0.9"**

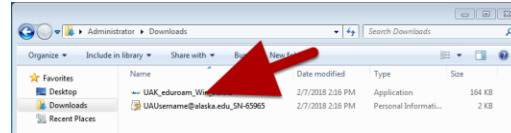

**Double click to install the certificate**

### Click "Next >"

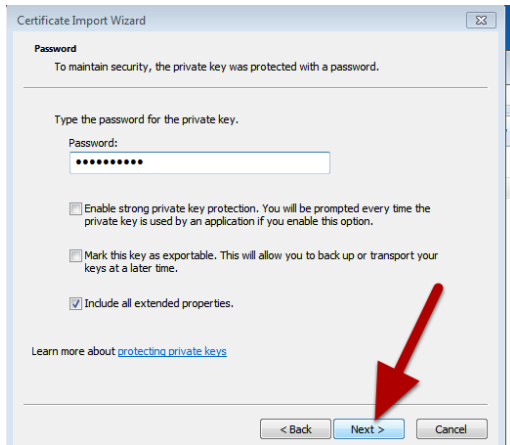

### Run the eduroam wizard.

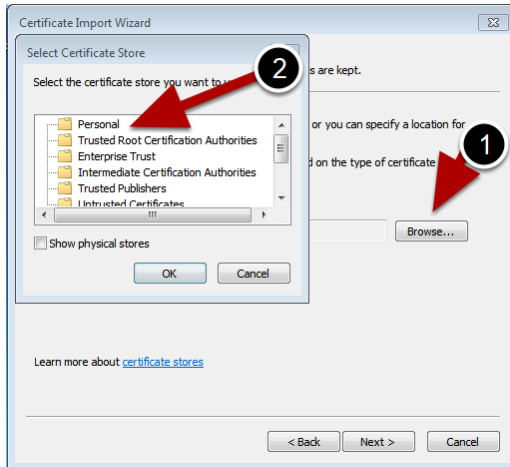

### Select the eduroam network in the Wi-Fi icon in your toolbar.

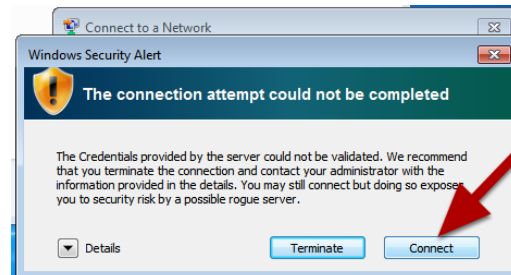

### The password is your UA username

### Place the certificate in the Personal store

### Click Connect.

**You are now connected to the eduroam Wi-Fi network.**
