Process Improvement Projects and Tasks

Standardization of FML processing

The Employee Transitions and Benefits team is continuing the work to improve and standardize the processing and tracking of Family Medical Leave across the UA system. This includes assessing current processes, establishing common tracking methods and new streamlined processes to implement new tools to collect and manage FML requests efficiently and securely.

Update as of 1/24/2020: The team is developing procedures and a checklist to identify areas the new portal can help with automation. The additional earnings code HRIS developed for the separate tracking of FML related to adoption/pregnancy/childbirth is with EAS for programming specific behavior during the payroll process.

Recruitment Alignment Project

The goal is to improve the current recruitment process for departments, hiring managers and HR staff. We will be forming the steering committee and focus groups over the next several weeks.

Update as of 01/21/2020: This project was placed on hold in 2018 in order to finish other projects that are in progress. This project will be reviewed for placement in the Talent Acquisition project improvement que.

Retirement File Project

The HR Information Systems group is working with the UA retirement vendors and outside consultants to revise the retirement contribution and eligibility file to meet industry standards. This will streamline internal processes and improve services to employees.

Update as of 1/24/20: The updated file formats are currently being sent to the four vendors as production files. EAS is working to complete the chain setup within App Manager for file generation during Payroll Processing and SFTP Transfer. Once finished, this project can be considered complete.

UAS Timesheet Feed for Facilities

The HR Information Systems group is working with the UAS IT and Facilities to create a timesheet feed directly to Banner for payroll processing. This will allow UAS Facilities to use their existing work order system for tracking worked hours and eliminating the need for double data entry of hours.

Update as of 1/24/20: UAS Facilities has finished setting up the rules in their work order system to track earnings codes. UAS IT has developed an export process for testing the beginning of February. HRIS is reviewing the file format and preparing for the testing to begin.

UAS HR Coordinator Consolidation

UA HR is working with UAS Leadership to develop a service hub to provide HR Coordinator services to Juneau Campus departments and employees. The staff in the hub will work fulltime to assist and support departments allowing specialization in HR processes. This will decrease the number of FTE spent by department personnel in HR functions.

Update as of 1/24/20: A draft position description is under development. Research into impact on a department level is continuing.

UAF GAPE Project Support

UAF is working on a process improvement project called GAPE (Graduate Award Process Efficiencies). UA HR is assisting in implementing this project by creating an electronic form through NextGen that will be owned by the UAF Graduate Office.

Update as of 1/24/20: Workflow of electronic form creation has been drafted. Comments have been received by stakeholders on form content.

Personnel Process Alignment: Historically, each campus had their own processes for setting up and making changes to employee data. UAHR is currently reviewing those differences and proposing a more streamlined approach that addresses consistency, efficiency and compliance

requirements. As changes are identified, notification is being sent out to the HR Coordinators across the respective campuses.

Update as of 1/24/20: Job forms and supporting documentation is now being submitted through NextGen directly to the Personnel team for approval and entry. References are being added to Spoke so that HR Coordinators have instant access to current and correct information as they need it.

UA HR Website

A project plan is in place to develop one UA HR webpage. The project team has been assembled and a meeting with the Key Stakeholders is set for Friday, January 24, 2020.

Consolidated UA Pooled PCN List

There are currently more than 1,000 pooled PCN's that are used for hiring all non-benefited employees, including adjuncts, students, and temporary employees. UAHR is working in coordination with the Budget Offices and HR Coordinator representatives from all three campuses to implement a single list of less than 100 PCN's.

Update as of 1/24/20: The project team has met to brainstorm on ways to implement this efficiently at each of the campuses. Risks have been identified and plans to mitigate those challenges are being worked on now. Communication and updated tools are being prepared for the HR Coordinators. The new Pooled PCN list will be available for departments to start using by April 2020.

Update as of 1/24/20: HR continues to work with Ellucian to address outstanding issues. Errors reported by users are being addressed with EAS or Ellucian, as appropriate. There are fifteen pages that were re-transformed that need to be tested by HR prior to being deployed to the live Banner 9 environment.
