---

\* Total Resource Access includes all events that occur as the result of any user engaging an object(course) at least once. For example, if User X accesses Course A once and User Y accesses Course A five times, the resulting total is two course accesses.

\*\* Access Count represents the total number of times these learning events have been accessed. For example, if User X access SkillBrief A once and User Y accesses SkillBrief A five times, the resulting total is six.

\*\*\* Job Aid and SkillBrief usage only reflects assets launched from SkillPort via the course summary page, My Favorites, or Search-and-Learn. Job Aids and SkillBriefs that are accessed from within a launched course are not reflected in this report.
