Preliminary Course Registration and Admission Activity, Fall 2026
Week 11 of Instruction
November 02, 2026

This report summarizes Fall 2026 course registration and admission activity as of Monday, November 2, 2026. Trend figures are normalized relative to the first day of instruction. The deadline for students to add or drop semester-length courses was Friday, September 4, 2026; however, students enrolling in short-session and late-start courses will continue to generate registration activity through the end of the term.

Executive Summary

As of the 11th week of instruction, systemwide enrollment remained stable compared to Fall 2025. Student credit hours increased by 0.2 percent (441 SCH) while student headcount declined by just 0.4 percent (90 students). Despite a slight decline in headcount, student credit hour production increased year-over-year, indicating stable instructional activity and modestly higher credit-taking among enrolled students. Although overall enrollment changed little, the composition of the student body shifted favorably, with growth among first-time undergraduate students offsetting declines in several other populations.

Growth among first-time undergraduate students remained the strongest positive enrollment trend. Registered first-time students increased by 5.0 percent (124 students), more than offsetting declines among transfer and graduate student populations. Because first-time undergraduate students are an important source of future enrollment persistence and long-term credit hour generation, this increase represents a positive strategic outcome for the university system. Growth in first-time students contributed to increases in registered students at UAF (75 students) and UAS (41 students), while UAA remained essentially flat (11 students).

The number of registered UA Scholars increased by 3.0 percent (10 students) systemwide. UAA recorded a gain of 9.0 percent (19 students). UAS experienced a modest decline of 6.0 percent (1 student) and UAF experienced a decline of 5.0 percent (8 students).

Applications and admissions continued to rise substantially across the system. Total accepted students increased by 85 percent (5,533 students) compared to Fall 2025. As expected, admission yield rates declined substantially after the implementation of open admissions at UAF and UAS. Because many more students now progress through the admissions process, accepted student counts increased considerably faster than registered student counts, limiting the comparability of year-over-year yield metrics.

While undergraduate enrollment trends were generally positive, these gains were partially offset by modest declines in graduate and transfer student enrollment. Overall, the enrollment data indicate that the university system has maintained stable headcount and credit hour production while making progress in attracting new students.

Based on historical registration patterns, preliminary projections suggest final Fall 2026 enrollment of approximately 20,400 students generating 186,000 student credit hours.

Institutional Highlights

University of Alaska Anchorage (UAA)

UAA enrollment remained relatively stable through the 11th week of instruction. Total headcount declined by 1.8 percent (207 students), while student credit hours decreased by 1.1 percent (1,120 SCH).

Applications were down 11.0 percent (821), admitted students increased by 39 percent (1,182), and registered students decreased by three percent (92), year over year. Enrollment leaders attribute the declines to fraud-prevention measures implemented during the admissions cycle, which reduced submission of non-genuine applications while improving the quality of the applicant pool. UAA's 21 percent drop in registered graduate students represents a substantial headwind for upper-level credit generation and revenue.

Among UAA's community campuses, the strongest gains occurred at Kodiak College, which posted enrollment growth of 28.6 percent (181 students), Prince William Sound College, which increased 29.1 percent (123 students), the School of Education, which increased 22.4 percent (66 students), and the College of Health, which increased 2.3 percent (53 students). These gains helped offset enrollment declines at Anchorage Campus and Mat-Su College, where enrollment decreased by 1.1 percent (102 students), and 8 percent (143 students), respectively.

University of Alaska Fairbanks (UAF)
UAF continued to post enrollment gains through the 11th week of instruction. Student headcount increased by 1.0 percent (74 students), and student credit hours increased by 1.8 percent (1,191 SCH).

Applications and admissions for first-time students expanded dramatically, indicating substantially increased engagement with the admissions process. Applications for this group increased 55 percent (3,215 more applicants), while admissions increased 224 percent (4,313 additional admitted students). Supported by these gains, registered first-time students increased by 8.0 percent (75 students).

Enrollment growth was concentrated on the Troth Yeddha campus (243 additional students, 2,425 additional SCH), particularly within the College of Liberal Arts, which increased enrollment by 6.2 percent (200 students), and the College of Business and Security Management, which increased 10.5 percent (139 students). Nearly all UAF rural community campuses experienced a sharp drop: Northwest down 53.5 percent, Chukchi down 20.4 percent, Kuskokwim down 9.9 percent, Bristol Bay down 8.1 percent, and CTC down 3.4 percent.

University of Alaska Southeast (UAS)
UAS continued its recent enrollment growth trend through the 11th week of instruction. Headcount increased 2.3 percent (47 students) and student credit hours increased 2.7 percent (370 SCH). Overall undergraduate enrollment remained strong with a 16.0 percent increase (44 students) over last year.

Enrollment growth at Ketchikan and Sitka more than offset a decline in enrollment at Juneau, resulting in overall institutional growth. The Ketchikan campus increased enrollment by 25.1 percent (129 students) and the Sitka Campus posted a 2.1 percent increase of 15 students.

Course Registration
Week 11 of Instruction
Fall 2025 and Fall 2026 (November 03, 2025 and November 02, 2026)

Note: Information is preliminary. Includes all for-credit course registration activity recorded in Banner. Valid trends are reported by normalizing dates relative to the start of instruction for each Fall semester. Fall 2026 semester instruction began Monday, August 24 and Fall 2025 semester instruction began Monday, August 25. Headcount is unduplicated at the reporting level, counting each student once and only once at each academic unit, academic organization and university that they enrolled at. Summing headcount over academic unit, academic organization and university will double count students and add up to more than the unduplicated system total, due to students utilizing courses from more than one location. Data is provided by UAA, UAF and UAS, extracted at 5pm on the report date from UA information systems.

Note: In April 2026, UAA implemented a fraud-prevention software platform to identify potentially bogus applications from entering our data systems. This creates a difference in application numbers between Fall 2025 and Fall 2026. For Fall 2025, this software was not in use and there were bogus applications in the count. As those do not appear for Fall 2026, it creates a misleading impression of a gap between the years that is not as large as portrayed in this count. Information is preliminary. All applications recorded by each university are considered; some students apply to multiple programs/courses and sometimes to multiple UA universities. The number of started applications counts both complete and incomplete applications. Accepted application counts and registered for course(s) counts are unduplicated at the reporting level; summing over distinct university level counts would add to more than the unduplicated system total because of double counting. To be counted as an accepted student who registered for course(s), an individual must have enrolled at the university delivering the program/course they were accepted to. Data is provided by UAA, UAF and UAS, extracted on the report date from UA information systems.

Registered for Course(s)	**316**	**364**	**48**	**15%**	△
% registered of those accepted to a program/course	65%	68%			

Note: Information is preliminary. All applications recorded by each university are considered; some students apply to multiple programs/courses and sometimes to multiple UA universities. The number of started applications counts both complete and incomplete applications. Accepted application counts and registered for course(s) counts are unduplicated at the reporting level; summing over distinct university level counts would add to more than the unduplicated system total because of double counting. To be counted as an accepted student who registered for course(s), an individual must have enrolled at the university delivering the program/course they were accepted to. Data is provided by UAA, UAF and UAS, extracted on the report date from UA information systems.

Applications, Admissions and Enrollment by Academic Unit
Week 11 of Instruction
Fall 2025 and Fall 2026 (November 03, 2025 and November 02, 2026)

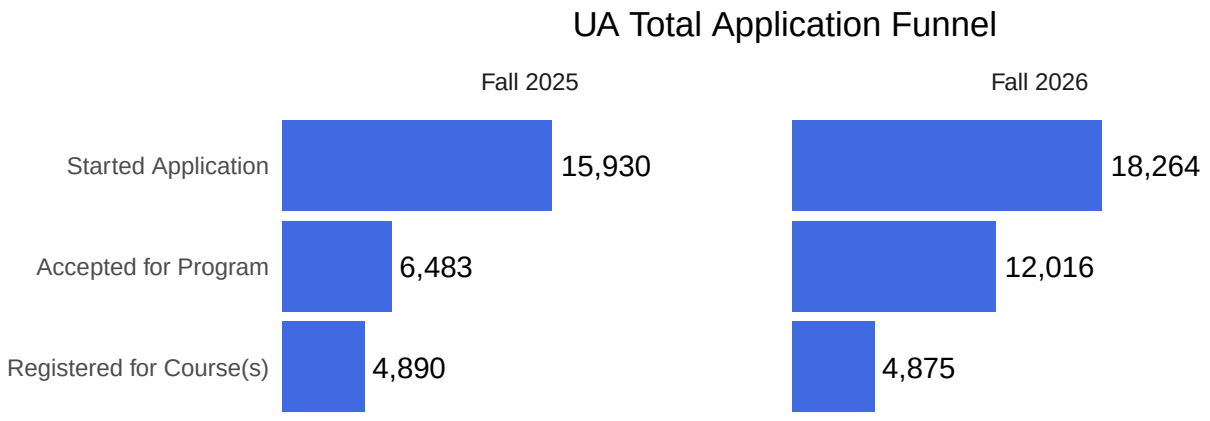

Note: Information is preliminary. All applications recorded by university are considered; some students apply to multiple programs/courses and sometimes to multiple UA universities. Headcount is unduplicated at the reporting level, counting each student once and only once at each academic unit, academic organization and university. The number of started applications counts both complete and incomplete applications. Accepted application counts and registered for course(s) counts are unduplicated at the reporting level; summing over distinct university level counts would add to more than the unduplicated system total because of double counting. To be counted as an accepted student who registered for course(s), an individual must have enrolled at the university delivering the program/course they were accepted to, they may not be registered at the unit they applied and were accepted into. Data is provided by UAA, UAF and UAS, extracted on the report date from UA information systems.
