FY23 (Fall 2021 to 2022)	55.8	59.3	40.0	44.4	33.3	33.3	52.7

Note: A student is considered to be retained if they for credit in the subsequent fall semester. Retention rates are calculated at two reporting levels: university and UA System level. University retention rates represent whether or not a student was retained at the same university they started, while the UA System level retention rate represents those who were retained any university in the UA System the following fall. The university cohorts are determined based on student class standing, full-time status, and degree combination at the university level. The UA System cohorts are determined based on student class standing, full-time status, and degree combination at the UA System level.

Note: A student is considered to be retained if he/she enrolls for credit in the subsequent fall semester. Retention rates are calculated at two reporting levels: university level and UA System level. University level retention rates represent whether or not a student was retained at the same university at which he or she started, while the UA System level retention rate represents whether or not a student was retained at any university in the UA System the following fall. The university cohorts are determined based on student class standing, full-time status, and degree combination at the university level. The UA System cohorts are determined based on student class standing, full-time status, and degree combination at the UA System level.

Note: Students self-report having indigenous racial heritage. A student is considered to be retained if they for credit in the subsequent fall semester. Retention rates are calculated at two reporting levels: university and UA System level. University retention rates represent whether or not a student was retained at the same university they started, while the UA System level retention rate represents those who were retained any university in the UA System the following fall. The university cohorts are determined based on student class standing, full-time status, and degree combination at the university level. The UA System cohorts are determined based on student class standing, full-time status, and degree combination at the UA System level.

Note: Students self-report having indigenous racial heritage. A student is considered to be retained if they for credit in the subsequent fall semester. Retention rates are calculated at two reporting levels: university and UA System level. University retention rates represent whether or not a student was retained at the same university they started, while the UA System level retention rate represents those who were retained any university in the UA System the following fall. The university cohorts are determined based on student class standing, full-time status, and degree combination at the university level. The UA System cohorts are determined based on student class standing, full-time status, and degree combination at the UA System level.

Note: A student is considered to be retained if he/she enrolls for credit in the subsequent fall semester. Retention rates are calculated at two reporting levels: university level and UA System level. University level retention rates represent whether or not a student was retained at the same university at which he or she started, while the UA System level retention rate represents whether or not a student was retained at any university in the UA System the following fall. The university cohorts are determined based on student class standing, full-time status, and degree combination at the university level. The UA System cohorts are determined based on student class standing, full-time status, and degree combination at the UA System level. Pell grant receipt is evaluated in July of the respective aid year.

The national six-year baccalaureate graduation rate for students enrolling at public, four-year, open admission institutions was 29.5 percent in FY19, about 22 percent lower than the rate for students attending UA at that time, 36.1 percent.

Last updated 09/14/2022. Graduation rates are calculated at two reporting levels, the university level and UA System level. University level graduation rates represent whether or not a student graduated from the same university they initially entered, while UA System level graduation rates represent whether or not a student graduated from any university in the UA System. A student is counted the first time they receive a degree and if multiple degrees are earned in one year, the highest degree is selected. University cohorts are determined based on student class standing, full-time status, and degree combination at the university level. The UA System cohorts are determined based on student class standing, full-time status, and degree combination at the UA System level. The six-year baccalaureate graduation rate of indigenous, degree seeking students enrolling at public, four-year, open admission institutions was 16.5 percent in FY19, about 25 percent below the rate for indigenous students attending UA, 20.4 percent.

Last updated 09/14/2022. Students voluntarily self-report race and ethnicity if desired; Indigenous students self-report at least some Alaska Native and/or American Indian heritage. Graduation rates are calculated at two reporting levels, the university level and UA System level. University level graduation rates represent whether or not a student graduated from the same university they initially entered, while UA System level graduation rates represent whether or not a student graduated from any university in the UA System. A student is counted the first time they receive a degree and if multiple degrees are earned in one year, the highest degree is selected. University cohorts are determined based on student class standing, full-time status, and degree combination at the university level. The UA System cohorts are determined based on student class standing, full-time status, and degree combination at the UA System level. Last updated 09/14/2022. Students voluntarily self-report race and ethnicity if desired; Indigenous students self-report at least some Alaska Native and/or American Indian heritage. Graduation rates are calculated at two reporting levels, the university level and UA System level. University level graduation rates represent whether or not a student graduated from the same university as he or she initially entered, while UA System level graduation rates represent whether or not a student graduated from any university in the UA System. A student is counted the first time they receive a degree and if multiple degrees are earned in one year, the highest degree is selected. The university cohorts are determined based on student class standing, full-time status, and degree combination at the university level. The UA System cohorts are determined based on student class standing, full-time status, and degree combination at the UA System level. Last updated 09/14/2022. Developmental refers to courses that provide basic or supplemental preparation for introductory college courses. Developmental courses are available in several areas, with those in math and English making up the majority taken. Developmental coursework is not applicable to transcribed certificates or to associate, baccalaureate, or graduate degrees, even by petition. A developmental course is one that has a course number from 050 to 099. Graduation rates are calculated at two reporting levels, the university level and UA System level. University level graduation rates represent whether or not a student graduated from the same university as he or she initially entered, while UA System level graduation rates represent whether or not a student graduated from any university in the UA System. A student is counted the first time they receive a degree and if multiple degrees are earned in one year, the highest degree is selected. The university cohorts are determined based on student class standing, full-time status, and degree combination at the university level. The UA System cohorts are determined based on student class standing, full-time status, and degree combination at the UA System level. Last updated 09/14/2022. Students voluntarily self-report race and ethnicity if desired; Indigenous students self-report at least some Alaska Native and/or American Indian heritage. Graduation rates are calculated at two reporting levels, the university level and UA System level. University level graduation rates represent whether or not a student graduated from the same university as he or she initially entered, while UA System level graduation rates represent whether or not a student graduated from any university in the UA System. A student is counted the first time they receive a degree and if multiple degrees are earned in one year, the highest degree is selected. The university cohorts are determined based on student class standing, full-time status, and degree combination at the university level. The UA System cohorts are determined based on student class standing, full-time status, and degree combination at the UA System level. Note: Headcount is unduplicated. The student count includes only students enrolled in declared majors, and excludes pre-majors, Bachelor's Intended, non-degree seeking students, and non-majors. Degree status at the system level for students enrolled in degree programs at multiple units and/or universities is counted only once and is classified by the student's highest degree status within the system. A student may be taking a classes from a university other than the one at which he/she is seeking a degree.

<b>Percent of Total</b>	<b>8.0%</b>	<b>92.0%</b>	<b>100.0%</b>	<b>14.1%</b>	<b>3.7%</b>	<b>8.3%</b>	<b>3.8%</b>	<b>60.8%</b>	<b>9.2%</b>	

Note: Student demographic information is self-reported. UA utilizes an unduplicated race categorization, although students often identify as more than one race/ethnicity. This compilation method allows each student to be counted uniquely. For example, if a student identifies as Alaska Native and White, that person would be recorded as one Alaska Native student, for a total headcount of one.

Table 2.09 Headcount of Top Ten Largest Programs by Degree, Major and University Fall 2022

	Degree	Major	Headcount
UA Anchorage	Nursing*	Bachelor of Science	606
	General Program	Associate of Arts	393

Note: Career cluster categories consist of entry-level through professional-level occupations within a broad industry area and are assigned based on the degree or certificate received. Historical data is recategorized to reflect current career cluster assignments, in order to provide valid comparisons. Other category represents majors missing a career cluster association in the common data warehouse at the time of publication.
