UNIVERSITY of ALASKA
Many Traditions One Alaska

# Summary: Research and Sponsored Programs

The University of Alaska's research and sponsored programs advance knowledge and serve the diverse populations of rural and urban Alaska. Funded by federal, state, local, and private sponsors, these programs focus on areas such as social, economic, biological, geological, and marine sciences. Research activities are not limited to classrooms or labs but take place in various locations throughout Alaska.

University of Alaska research revenues, including indirect cost recovery, totaled $295.4 million in FY26. The ratio of research revenue from designated, federal, and other sources (DF&O) to unrestricted general funds (UGF) measures the return on state-appropriated research funding. In FY25, each state dollar appropriated to UA research generated $12.8 from other sources (Table 1).

In FY26, UAF generated approximately 91.6 percent of total research revenue ($251.2 million), with 91.9 percent of this from designated, federal, and other sources. UAA generated 7.7 percent ($21.2 million) of FY26 research revenue, with 95.4 percent coming from sources other than unrestricted general funds. UAS generated the remaining 0.7 percent ($2.0 million) of the system's total research revenue, with 100 percent from designated, federal, and other sources (Table 1).

The research and academic units with the highest research revenues in FY26 included the UAF Geophysical Institute $107.2 million, College of Fisheries and Ocean Sciences $62.7 million, Institute of Arctic Biology $20.2 million, International Arctic Research Center $14.3 million, and Institute of Northern Engineering $12.3 million (Table 2).

In FY26, universities held 1,621 active grants with a maximum multi-year funding commitment of $1.5 billion, down $133 million from $1.6 billion in FY25 (Table 3). New grants awarded in FY26 totaled $137.3 million, representing 9.2 percent of all active funding commitments (Table 3). Of this amount, 50 percent came from newly committed grant funding, secured through 144 new competitive grants (Table 5).

The federal government is the largest source of research funding, providing 86.0 percent ($198.4 million) of FY26 direct research expenditures, either directly or through state and local entities. State of Alaska funding provided 6.8 percent ($15.8 million) of FY26 research expenditures, while private, local, and other sources contributed the remaining 7.1 percent ($16.4 million, Table 6).

UNIVERSITY of ALASKA
Many Traditions One Alaska

A measure of the return on state appropriated research funding is the ratio of non-general fund research revenue to general fund research revenue. In FY26 each state dollar appropriated to UA research generated $12.8 in revenue from other sources.

Note: Unrestricted General Funds (UGF) include General Fund, General Fund Match, and General Fund Mental Health Trust. Designated, Federal and Other Funds (DF&O) include UA receipts, intra-agency receipts, and indirect cost recoveries generated from research and redistributed to other areas.

| Total | 465.7 | 420.2 | 175.0 | 645.1 | 1,082.9 |
| | | | | | |
| Total Alaska Related Expenditures | 104,188.3 | 119,177.2 | 131,140.3 | 125,487.5 | 108,005.5 |
| Percent of All Research Ependitures | 57.4% | 61.7% | 59.5% | 50.1% | 46.8% |

Note: Direct research expenditures in Alaska related research areas represent research expenditures including indirect cost recovery (ICR), and do not reflect the max multi-year revenue amount. Direct research expenditures are defined as the amount of grant-funded operating and capital research expenditures, including both research expenditures as well as ICR from restricted research grants spent on research and administrative support. Areas of research related to Alaska are identified by the grant.
