¹Sometimes the courses required by a new degree or certificate program are already being taught by a UA university, e.g., as a minor requirement. Similarly, other program needs like equipment may already be owned. 100% of the value is indicated even though the course or other resource may be shared.

Summary of Degree or Certificate Program Proposal

Other (optional)

Discontinuation of Low-enrollment Master's Programs in the College of Engineering and Mines

The University of Alaska of Alaska Fairbanks requests that the UA Board of Regents discontinues the following low enrollment master's degree programs:

Arctic Engineering
Engineering Management
Science Management
Environmental Engineering
Mineral Preparation Engineering
Software Engineering

Collectively, these are specialized degree programs that have not attracted a significant number of students in the past decade. Admission to these programs was suspended between one and three years ago, in the course of a series of special program reviews of low-enrollment programs being carried out by UAF. Mineral Preparation Engineering and Software Engineering have no enrolled students. Arctic Engineering, Science Management, and Engineering Management have one student each that has enrolled in the minimum of six credits in FY17 to remain an active graduate student. Environmental Engineering has three students. Nearly all of these remaining students will probably complete within the next year, but delayed implementation of the program discontinuations is requested to allow them ample time to finish.

Factors leading to the lack of or loss of student interest in these programs includes the fact that students appear to prefer degrees with broader vs. narrower scope, e.g., Civil Engineering over Arctic or Environmental Engineering. Similarly, students appear to prefer the MBA program to either Science Management or Engineering Management, particularly since the UAF MBA program has now developed a pathway for students without undergraduate degrees in business. In the case of Mineral Preparation Engineering and Software Engineering, all of the associated faculty retired or resigned within the past five years, and were not replaced owing to the low demand for the programs. Arctic and Environmental Engineering and Engineering and Science Management faculty continue to teach within the Civil Engineering program.

The College of Engineering and Mines (CEM) still offers many graduate programs, i.e., a Ph.D. in Engineering, Master's in Civil, Electrical, Geological, Mechanical, Mining, and Petroleum Engineering, and Master's in Computer Science and Environmental Quality Science. Students with interests in Environmental Engineering and Arctic Engineering can still take relevant courses and carry out related research through the MS in Civil Engineering program, and in the case of Arctic Engineering, the MS in Geological Engineering program. The proposed discontinuations will not significantly affect either graduate student enrollment or research in CEM.

Program Discontinuation Motions September 2017 Meeting of the UA Board of Regents

Arctic Engineering

The Board of Regents approves the discontinuation of the Master's of Science in Arctic Engineering at the University of Alaska Fairbanks, effective upon completion of the teach out, set for the end of spring semester 2019. This motion is effective September 14, 2017.

Engineering Management

The Board of Regents approves the discontinuation of the Master's of Science in Engineering Management at the University of Alaska Fairbanks, effective upon completion of the teach out, set for the end of spring semester 2020. This motion is effective September 14, 2017.

Science Management

The Board of Regents approves the discontinuation of the Master's of Science in Science Management at the University of Alaska Fairbanks, effective upon completion of the teach out, set for the end of spring semester 2019. This motion is effective September 14, 2017.

Environmental Engineering

The Board of Regents approves the discontinuation of the Master's of Science in Environmental Engineering at the University of Alaska Fairbanks effective upon completion of the teach out, set for the end of spring semester 2020. This motion is effective September 14, 2017.

Mineral Preparation Engineering

The Board of Regents approves the discontinuation of the Master's of Science in Mineral Preparation Engineering at the University of Alaska Fairbanks, effective spring semester 2018. This motion is effective September 14, 2017.

Software Engineering

The Board of Regents approves the discontinuation of the Master's of Software Engineering at the University of Alaska Fairbanks, effective spring semester 2018. This motion is effective September 14, 2017.
