

## DegreeWorks Work Team Agenda for July 21, 2008

Group: DegreeWorks Work Team

Topic: Weekly Team Meeting

Date: July 21, 2008 at 8:30 am

Attendees: Mark Nichols, Barbara Hegel, Janet Johnson, Emily Thielke, Colleen Abrams, John Allred, Patty Itchoak, Craig Mead, Jessica Kronen

=====

### Agenda;

RPE for Course Repeat Flags (see at end of agenda)

- . Will not add support this RPE as we will not be using it.

### Changes delivered 07/14/08

- . Configurable download
  - . Now installed for all campuses
- . Transfer Credit Equivalencies should be fixed
  - . Now works correctly, at least for a single attendance file
  - . Need to check for cases in which a student has multiple attendance periods
  - . Need to Process New to get the transfer information to show correctly
- . Now can exclude certain grade modes from coming down
  - . Will need to look at this with Mark next week

### Notification of problems

- . Need to have notification when a problem occurs as soon as it does.
  - . Should be sent to the [sdworks@alaska.edu](mailto:sdworks@alaska.edu) group and cc: Mark.Nichols@sungardhe.com

### Status reports

- . UAA
  - . Complete 229 of 263 – technical; still working on web review
  - . Working as expected for the most part
  - . Will have to change business practice in a couple of places
  - . Needed and Completed cannot be used in rule PROXY-ADVICE
  - . Not seeing slow refresh times
- . UAF
  - . Mostly complete 257 blocks, still need to be reviewed 46 blocks
  - . Slow refreshing – can take 45 seconds or more
- . UAS
  - . Question about attaching minors with specific majors – Through secondary tags – Description can handle this as well. Mark will work with us on this during the next training
  - . Have 55 blocks done, 48 not done, 1 progress, 7 pending
  - . Test scores not working correctly – not been reviewed at either of the other institutions yet.

- . Mark
- . Need to pull over all students now – not just specific ids. David will be asked to pull all students.
- . Inefficient code found in the scripts that we were given earlier this week
- . Read documentation for pulling a student who does not exist in DW
- . Can all 3 refresh at same time? Not sure whether Banner can handle it or if the server can handle it. Question for David
- . Switch for building a student who does not currently exist on DW – is a flag in D20 table

Reserved word ALLOW for rules. Something we might want to use.

Next meeting: August 11, 2008 at 8:30 (audio-conference) due to travel next week and that we have just met for the training the following week

RPE Number: 1-3SXHPI

Status: Planned

Process/Object: Course Repeat Flags

Date: 07/07/2008

Description: The client wants courses with a shrtckn\_repeat\_course\_ind of E to be sent to the Insufficient bin on the audit. For this example, the course in question is MATH 143. Their Repeat Skip E flag is set to N because they want the software to look at the Repeat Policy that is defined in the Repeat Policy E field (ideally 0, but this is not working yet so it is currently set to 4). If they change it to Y, it will exclude MATH 143 and solve the problem, but they would prefer to have all courses with a repeat flag of E included in the insufficient bin.
