

DegreeWorks Work Team Minutes for September 15, 2008

Group: DegreeWorks Work Team

Topic: Weekly Team Meeting

Date: September 15, 2008 at 8:30 am

Attendees: Mark Nichols, Colleen Abrams, Carrie Coxon, John Allred, Craig Mead, Barbara Hegel, Peter Sommers, Tim Stickel, Janet Johnson, Melissa McGinty

=====

Agenda:

When can David clone UAA and UAF DW instances?

. Wednesday will be good for UAA

Student Information area contains information that only applies to baccalaureate degree.

. Will be blank for degrees other than baccalaureates. May want to fill it with N/A or something to that effect later. Wait until web localizations comes back and then decide what to do.

Status reports

. UAA

. Question about adding in-progress classes to progress bar. Do not know if progress bar included in look ahead audit. (Does exist in the Planner. Flag (D36 – SEP30 – set progress bar - has been turned off. Has been turned on for UAF and UAA. UAS will check their flag setting later.)

. '\*' included in title of all GER's. Wondering if '\*' indicating course has prerequisites can be changed to something else like '+' to minimize confusion. Mark will check with Dennis to see if this has been done in the web localization changes. UAS put '\*' into the legend but now remembering that their GER's contain the '\*' in the title as well.

. UAA wants to bring over all admitted students, not just those with enrollment and/or transfer credit. Need to discuss this once we know more about the database sizes. Can purge old records off in a couple of ways – truncate the database or through deleting specific ids from the system.

. UAF

. Renumbered classes, variable credit classes and pass/fail classes also offered as letter graded being worked on.

. Sent in web localization last week.

. UAS

. Have nothing. Problem with Minors is fixed now. Peter is now a scribing God.

. Sent in web localization last week.

. Mark

- . Dennis is working with David to load UAA's web localization. No one has heard anything about the status of Web localizations since the message from Dennis to David.
- . Mark on vacation from this Wednesday (9/17) through next Wednesday (9/24 am).
- . Update on UAF staff/faculty training on Friday, October 3<sup>rd</sup>. 2 new staff coming with Mark this session. Is it ok to have them do a couple of the presentations during this training? Ok with UAA, UAF, UAS. Looking at space to determine which and how many advisors will attend on Friday. Tuesday through Thursday (9/30-10/2) for the main group and Friday (10/3) for advisors. Mark will be leaving on 3:20 flight on Friday.
- . Term on student master and term on the degree detail are not matching on student UAA. This will cause problems with the audit – cannot get an audit

#### Janet

- . All want to use the access through UAOnline and MyUA. Will probably not access directly through a URL. Do not know how we will access current instances (working or development instances) in the future. Janet will check with David.

#### Other Items

Next meeting: September 22, 2008 at 8:30 (audio-conference)
