DegreeWorks Work Team meeting July 13, 2009

Attendees: John, Craig, Colleen, Emily, Michelle, Peter, Lindsey, Barbara

Will use the same extract scripts as are being used in PROD but will reduce the number of active years from 2 to 1. Will pick up any student who has been active within the past year. Should save about 25% of the space.

Will also reduce the number of audits per student per program to 2. Most of us have the SureCode D20 table DAP14 parameter set to 3 at this time.

Will also have David gut the current student tables before changing to the new 1-year PROD type extract process.

UAF – 07-08 catalogs done, 2004-05 through 2007-08 done

UAA – 2005-06 through 2008-09 done
. Security has been worked on. John will send us information on what he and David did.
. Need to be sure that the PROD tables and scribe blocks are copied from PROD to PREP
    before the upgrade is done.

UAS – Through Bachelors, Changing start-stop academic years 2006-07 through 2008-09 will
    be done soon. Having the patches in has allowed UAS to continue on with the scribing.

Next meeting: Thursday, July 23rd at 8:30
