Notes from 06/18/2013 EMAS Audio:

Attendees: Kim, Jane, Julie, Crystal

Report from Winston: Everything going ok. Tweaks to bridge - most likely just between UAA and EMAS since Jane hasn't heard about any programming changes to Banner program.

Julie: Conf Report - NAC - PreConference - Vice President. What NAC is expected and how to help EMASPro. Brainstorming - what would you like to see, challenges, where see it going. General Conference - came back with some good ideas - PowerReport session was awesome. Need IT to give her server name - view (canned) and then SQL for fields. Good sessions - went really well. Custom dominant - upcoming release will allow for multiple formats.

Kim: Got a lot out of the conference - Report writing session - translate for Mary and Amy about our EMAS/Banner setup. See how others are using EMAS. Came back with questions - looking at tracking items - UAF probably going to do Toad/Excel file to load to EMAS.

Crystal: EMAS Pro is starting migration. April is set up with ID and access to servers. Optimistic - September, realist - October/November. Some changes in our office: Crystal is moving to other areas, Kim will be taking more of a lead with EMAS, our recruiting team will be taking more of an active role with communications.

Julie: Retention Pro on horizon - ideally September for getting it set up in test database most likely.

Crystal: Very interested in a way to merge duplicate records with identifying good record and bad record. Stages, and substages. Address verification within EMAS.

Jane: No updates. Any changes to bridge require Task Request. FAFSA being worked on by Daniel.
