- Faculty Override in UAOnline

**Discussion:**

o   After testing UAF have found there are some show stoppers in this override. One is the capacity override. This is a problem for UAF but this is what UAA really wants.
o   The change is all or nothing thus you cannot pick and choose which override to allow.
o   Waitlisted situation – could this be done through the override? – **No**
o   Issue: Student's names are not removed when we go into the override screen again.
o   Underage students (secondary school) must have a faculty signature to allow into the class. Would this be able to handle this? – **No**
o   **Could the title be changed to UAA Registration Overrides….Jane thinks so.**

From Tim's June 17 email

1) Capacity Overrides (need to correct spelling) is available.  Is it wise to have Capacity Overrides available for faculty?  I don't believe so as it may result in too many room changes for us.

2)  Does UAA and UAS use Honors Program Overrides? UAF requires Honors Director Approval for these courses.  We do not want Honors Program Override available to faculty. Upon testing, I was able to add a student into a course using the Honors Program Override (not the UAF Honors Director Approval).

3) Since UAF uses Wait Lists, we would like the functionality to have faculty add students from Wait Lists to their class using Registration Overrides.  We manage Wait Lists up to the first day of instruction.  Can this functionality be made available only after a certain date for a term?

4) When I provided Registration Overrides for one student and I tried to add another Registration Override for another student, each time I went back to the Registration Override tab, the name of the student (whom I just provided an override) still appears.  This is very confusing for faculty (and myself).  If a faculty adds a Registration Override for one student, the system should refresh it and provide an "ID Selection" option to add a Registration Override for another student.  I could not get these features to work.

5) Related to 4 - when selecting "ID Selection" at the bottom of the Faculty Registration Permits/Overrides worksheet and entering and verifying the name of the student selected, the system brings you back to the Faculty And Advisors Student Menu which doesn't have an option to get you back to the Registration Overrides screen.  This may be addressed via number 4.

6) UAF requires instructor permission if the student enrolling is a Secondary Student. We would like a Registration Override available for Secondary Students. We may just have to build a new code.

7) The notation (on the Registration Overrides screen) saying "Welcome to the Faculty

Registration Permits/Overrides Worksheet, can be removed.  It is a repeat of the main heading for that screen.

**UAA, UAS and UAF approve with the idea to review in a few months.**

From Mary - Hi Team Leads,
Please add a discussion to your next team meeting about the priority of task requests in the queue:
http://bweb4lrgp.alaska.edu/banlrgp/owa/bwsk2rqs.P_DisplayRequests?pORDER=6&pSTAGE=

Are there certain ones that you want to move to the top of the work queue for more immediate attention?  With Banner 8 moving out by a few months, are there items to add to the "got to have before Banner 8" list?  We will go through the task request list at the Aug 6th BST.
****************
From Diane M - First complete those currently being tested:

UAOnline Bookstore Logo (already done?)
Virtual Bookstore Interface (in testing?)

Then the one that's already been started:
1. UAOnline Address Verification –close to LRGP
Of those that have been approved, the more recent text update could be done pretty quickly, and could be moved before the older but more involved schedule lookup mod.
**2. Update UAOnline Reg/Drop/Add instructions**
3. Faculty Lookup Classes Mod –nice but not critical

Make a 9 -SFR2APS - modify so simultaneous runs are not allowed.
Make a 9 -The "Mandatory payment agreement" TR is Finance, not Reg.

Update to Soremal – From Lora

    Lora checked with her co-workers regarding their use of this form – neither Financial Aid or Admissions is using this.

Trigger for reg changes – Tim wanted to know how the workflows are working? UAS sees them as very positive for students.
