

Reg Team 10/22/2009 at 2:30pm

Phone # 800.893.8850  
Code # 638 4637

Attendees: Barbara, Diane, Brigitte, Lora, Patty, Mary, Tim, Jane, John

**From Diane**

Please add the attached TR to the agenda for Thursday. It's a request to recode the existing processes, SFP2ICR (Insert Campus Restrictions) and SFP2DCR (Delete Campus Restrictions). As they stand now, they can be used to permit students affiliated with only a single campus to register for that campus's courses. However, there is a need to permit students from multiple campuses to register for a campus's courses. For example, UAS would like to be able to restrict registration during priority registration to degree-seeking students affiliated with any of the UAS campuses, Juneau, Ketchikan, and Sitka. I believe UAA and UAF may also be interested in being able to place similar restrictions.

(task request attached)

**BST bound – approved by UAA, UAS & UAF**

**From Lora**

I went to UAOnline to check my registration eligibility for spring 2010 and there is not an option to do this; only fall 2009. Can we have them add spring? We're trying to encourage students to be more proactive but we need to have the tools in place to do so.

**Colleen wrote this will be turned on when web view is available on October 26.**

**From Patty**

We want to modify the SFR2ENR process to allow us the option of capturing stats based on the 'Session' codes we have entered on SSASECT. There is a need to start capturing stats by campus based on certain courses enter here (ie, Distance Education) where we use the session code of 'X' or 'Y' to identify these courses.

This task request will basically add a new parameter to provide us with this option.

Can you please review at your next team meeting as I would like to submit it up to the BST for discussion if you have no issues with this request?

(task request attached)

**BST bound – approved by UAA, UAS & UAF**

Look at rules for 201001 – **SOATERM**

Patty updated the form during the meeting – following 200903 rules  
WEB REG DATES – 10/26 to allow UAF students to pull their forms  
Reg Error Checking - set

Workflow discussion – Registration transaction workflow – confirmation email (Amazon style confirmation)

Pat is looking at doing this as a true workflow and not an evening event

If they have a UA generated account a schedule would be sent – if not UA email account only a message will be set to their personal account.

SFASTCA codes would be triggers when - BASE not when TEMP.

Look at reg codes to capture all actions – John will send out a list of codes to make sure we have all of them. Remember – CC, FR, FW, AL, FB, DN – are all part of another workflow.

Discussion of Hotels for face to face - Lora mentioned a new Marriott on Main Campus. Mary will ask Kim to check into this.
