Agenda:

From Colleen:

Currently the class lists on SFASLST and SFAALST are often in registration status/student last name/ student first name order on these screens. That is due to running SFRSLST on a nightly basis. With the Banner 8 upgrade, the sort sequence used when update was requested is what you are seeing on SFASLST and SFAALST. If we change the nightly runs to use SFR2LST, then SFASLST and SFAALST will show the class list in student name (last, first) order.

The programmers have been asked to fix this and as of this morning – it was not done.
