Reg Team Audio

Presenter 6384360

Participant 6384637

Dial in: 800.893.8850

Attendees: Patty Itchoak, Susan Culley, Mae Delcastillo, Shelly Blatchford

AGENDA

- SFAMASS – Susan/ Mae

I would like to discuss bringing back the SFAMASS form that we lost when the SFAMREG came in. If there is enough support, I would like to do it before the F2F- Susan Culley

Inquiries from staff and acad dept admins to see if at all possible to have SFAMASS return in Banner (helps with cancelling student out of classes easily, previous reg status codes can be easily retrieved for academic depts.)

- SFAMASS was replaced with SFAMREG
- There was an incident that a class was cancelled and the dept wanted to reinstate/reregister students back into the class- SFAMASS quickly retrieved previously 'CC' students; SFAMREG does not have this capability (Susan)
- Academic depts. utilized SFAMASS in the past to contact students who have dropped (with DC and DW registration status codes prior to being cancelled 'CC' in the system) to notify other options or sections available to register.
- SFAMASS- had great features to retrieve previous students registered with other registration status codes (maintain a list before a class is cancelled)
- Patty suggests asking Jane if it is feasible to make some local modifications to the current SFAMREG (SFA2REG?) form with the preferable features from SFAMASS. What did we like about SFAMASS that we would like include into SFA2REG? It is best to not make changes to the baseline.

*****Just contacted Jane: Per phone conversation, her reply is that it might be possible to do a local mod; further research is needed. I would need to follow-up with an email to her.***

- SFARSTS 'WW' Registration Status Code- Mae- Has anyone run into any issues with having to remove withdrawals for when the intention was to drop? *What about if the student was on waitlisted status and intended to drop not withdraw? (Mae)*
 - None at UAA and UAF does not use the code. UAA does not use have a waitlist. UAA uses it only for full term courses up until 11/18 and UAS the same until 11/25 (the end of the withdrawal period)
 - There are known issues with codes with the upcoming waitlisting
 - If student accidently did not intended to withdraw at that time- student immediately notifies Registrar's office

- Other items?
 - Susan wanted to confirm if it is true that we cannot have Reg and Web Grading turned on at the same time? For UAF's midterm grading. Not a true statement that we know of. The reason may be due to UAF's advisor's signature required during that time period when Mid-term grading is turned on- web registration is shut off.

REMINDERS:

LRGP Refresh- Sept 26th & Sept 27th (email from Jane Vohden 9/16 to BST Listserv)
Please make sure you test and approve any pending TRs or else programmers would have to reapply modification in the database

Need UAF's approval for SFRSCHD (Student Schedule Printout) – email from Mae 9/20
Susan will test as soon as possible
