

Reg Team Audio
January 26, 2012- 2 p.m.

Attendance: Sandy, Mae, Patty, Barbara, Libby, Jane, Shelly, Mary & Lora

Waitlisting- Are we still hoping to roll out for summer? If so we have only a few weeks left to get into PROD.

- We can all turn off waitlisting through SFARSTS at different times
- Currently SOAWLTC turns automatic waitlisting on for any courses which have waitlisted seats in them so you are unable to run a manual process unless you uncheck the box for EACH CRN in SSAWLSC. Jane will see if they can run a script to uncheck it for all CRNS and we can put in on the ones we want.
- Jane will also add SFRBWLP to the daily run of processes- this is necessary to update student's registration status to DD and remove the registration record after time limit has expired so it moves on to the next person.
- Most of us plan to do a soft launch with only 1-2 departments initially
- We are still unsure whether we will know enough before fall term registration opens. Sandy plans to advertise for auto waitlisting for fall in hopes that we will be ready.
- Lora will resend waitlisting test notes from earlier (see attached)
- Issues Lora is finding are that the numbering system is inconsistent (will send this to Jane) Otherwise it seems to work better than before the upgrade.
- We will discuss again in 2 weeks.

Upgrade Testing- We need to do thorough testing of all registration processes (look at UAOnline but should not need thorough testing of self services). Testing plans are due to Mary by February 9th. Barbara will be hosting two testing audios:

Tues Jan 31s 1pm-3pm

Wed Feb 1st 1pm-3pm

Dial: 1-800-893-8850, code 2967 390

Barbara is awesome!

BOF- Items related to registration for Mary to take to summit?

- It would be great if they could discuss the ability of waitlisting to be taken down a level so that we don't ALL have to do automatic, etc if we don't want to.
- Other things send to Mary

Tabled Items:

- Non Standard Registration (Tech Prep, PACE, Continuing Ed)

Next Meeting is February 9th at 2 p.m.

-
