Agenda Items:

The EAS team has been working on a function that can be called from multiple programs to more consistently handle emails. Our first priority was getting the SFRBWLP (the batch waitlist notification process) to work with it. Russell has moved it into LRGP and would like to attend today's meeting to discuss it and answer any questions.

- Preferred email project to be consistent across all schools. Students are now able to choose preferred email in UAOnline and statewide are now going through reports, processes, programs, etc to replace email with preferred logic. First one is available to test SFRBWLP in LRGP. In PROD right now it goes to flagged preferred, but if no preferred it goes nowhere. In LRGP it will now go to PREF or to flagged preferred.....this is going back for some tweaks- hold off on testing for now.

Waitlist Notification Letter

- Mae asked Barbara to ask Colleen where we change this letter from 36 to 48 hours. They are giving bad information. SOAELTR is the place to update SW_WL_NOTIF.
- Patty fixed it for us.

Set up for Spring Registration
