

The University of Alaska, Office of Information Technology, is excited to sponsor our 10th Rural Sites Training Conference (RSTC) in Fairbanks.

RSTC is an annual University of Alaska event that offers rural employees from all three MAU's the opportunity to come and receive face to face training in their Functional Areas (HR, Finance, Student Services).

This year's RSTC will focus on the use of Banner and will include sessions on Banner Navigation, QMenu/QAdHoc, TOAD (which replaced Data Browser) and Student Information specific Banner Forms.

This year RSTC is followed by UA's 3rd annual TechFest (Oct 6-8) and all attendees are welcome to participate!
